Description

Annotated bibliography to support college and career readiness with the following research questions:

- What are the current practices in the field of college and career readiness that are related to issues of equity, opportunity and achievement?
- How well do CCR programs addresses equity and access for all students?
- Which CCR programs have the greatest impact on student outcomes?

Opportunity

Annotated bibliography outlines key findings and research methods from a variety of studies in college and career readiness with a focus on programs, instructional practice, and student outcomes. It also provides relevant frameworks that can be leveraged in research and practice.
